DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Cassel et al (U.S. Patent 6,245,837).

Cassel et al (see the entire document, in particular, col. 2, lines 40-48 and Example 1) teach a process of making cellulose products as set forth in the instant claims, including dissolving cellulose in N-methylmorpholine N-oxide, and extruding through an extrusion die via an air gap (of 20 mm) into a precipitation bath, wherein the precipitation bath contains a tenside (or surfactant) in an amount of from 50 ppm to 1,000 ppm.

Allowable Subject Matter

3. Claims 4-7 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1732

4. Claims 12-18 are allowable over the prior art references presently of record.
